## INTERNATIONAL PRELIMINARY REPORT ON PATENTABILITY

International application No. PCT/GB2004/000753

Box No. V Reasoned statement under Article 35(2) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement

1. Statement

Novelty (N)

Yes: Claims

1-10

No: Claims

Inventive step (IS)

1-10

Yes: Claims No: Claims

Industrial applicability (IA)

Yes: Claims

1-10

No: Claims

2. Citations and explanations (Rule 70.7):

see separate sheet

#### INTERNATIONAL PRELIMINARY REPORT ON PATENTABILITY (SEPARATE SHEET)

International application No.

PCT/GB2004/000753

#### Re Item V

Reasoned statement with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement

Reference is made to the following document/s/:

D1: FR-A-2083160 (STEHNING)

D2: GB-A-1321709

The present invention relates to a stirring apparatus (claim 1), or a system including many of them (claim 7), and a method of using that apparatus (claims 8,9).

The document D1 is regarded as being the closest prior art to the subject-matter of claim 1, and shows (the references in parentheses applying to this document): a vessel having a conduit extending therefrom and a stirrer having a feeding screw section located in said conduit, and a stirring section located in the vessel.

The subject-matter of claim 1 differs from this known D1 in that the vessel is much smaller than the known ones, and there is a stirrer drive able to rotate the stirrer in both directions.

The subject-matter of claim 1 is therefore new (Article 33(2) PCT).

The problem to be solved by the present invention may be regarded as providing a system that avoids that the conduit may be clogged.

The solution to this problem proposed in claim 1 of the present application is considered as involving an inventive step (Article 33(3) PCT) for the following reasons:

None of the available prior art discloses such an system, furthermore, the system avoids the need of a valve at the entry of the vessel, as long as the stirrer is driven in the feeding direction, no material can escape from the vessel.

Claims 2-6 are dependent on claim 1 and as such also meet the requirements of the PCT with respect to novelty and inventive step.

#### INTERNATIONAL PRELIMINARY REPORT ON PATENTABILITY (SEPARATE SHEET)

International application No.

PCT/GB2004/000753

Remark: for the method, there should be a single independent claim only.
